

**AMENDMENTS TO THE ABSTRACT**

Please substitute the following paragraph for the abstract now appearing in the currently filed specification:

**--ABSTRACT OF THE DISCLOSURE**

An electronic device testing apparatus for conducting a test by pressing input/output terminals of electronic devices to be tested against contact portions of a test head portion while loading the electronic devices to be tested on electronic device conveying media by a moving device. Two electronic device conveying media loaded with electronic devices to be tested are gripped by one moving device and two electronic device conveying media loaded with electronic devices to be tested are gripped by the other moving device at a time, and the respective moving devices independently convey to and from the contact groups.--
